

# Stick With X-I-M<sup>®</sup>

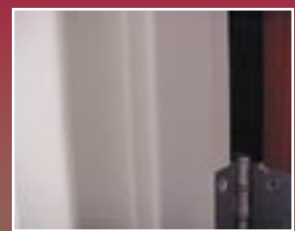

## Introducing XIM Latex X-Tender

Just 2 ozs. per gallon provides exceptional flow out and leveling qualities while extending open time to all latex paints, primers, stains varnishes, waterborne epoxies and coating films.

Without Latex X-Tender™

**Open Time Extender**  
Flow & Leveling Additive  
Improves Spraying & Brushing

With Latex X-Tender™

# XIM Latex X-Tender™ Additive

The best Latex paint extender available—anywhere!

Latex X-Tender™ is specially formulated to thin your latex paint's viscosity and allow thick paint to flow out evenly when brushing. It will also extend the "wet edge" or working time of the paint without affecting the paint itself or its cure time. Spray confidently with HVLP and see how smoothly thick paints spray without further reducing. Latex X-Tender™ is completely safe and biodegradable.

Just 2 ozs. per gallon provides exceptional flow out and leveling qualities while extending open time to all:

- Latex paints
- Latex primers
- Latex stains and varnishes
- Waterborne epoxies
- Latex coating films.

For use with all water base paints and primers.

- Clean up with soap and water
- No yellowing
- Will not cloud or yellow waterborne varnishes

Convenient new 2 oz. packets easily condition 1 gallon of latex paint.
